## Reports and Insights

Monitor and analyze your business with intelligent performance reports and real-time analytics

The SafetyCulture's desktop platform allows you to keep a bird's eye view of your business progress. The all-in-one software system allows you to manage your organisation, work in teams, manage your billing, users, and devices. It is the go-to location for your templates, audits and analytics.

### Real-time Analytics

Keep a bird's eye view with our desktop platform for real-time updates. Track quality or safety metrics using our advanced analytics dashboard. You'll be able to spot spends, generate weekly, monthly or bi-monthly analytics reports that track your inspection progress. Pinpoint issues and take proactive measures to keep your teams and projects running smoothly.

## Dashboards, Charts and Graphs

Make data-driven decisions with interactive KPI dashboards, charts and graphs that update automatically. Your team can analyze the same data and access the latest insights. Sort and filter audit information as required and have a visual representation of your inspection progress.

### Monitor

Monitor your frequently Failed Items to ensure mission-critical issues won't arise in your business. Drill down into your audits with the most Failed Responses to create an action plan to rectify the issues.

### Filter Your View

Filter your dashboard view by template, audit, auditor or group.

### Identify Trends Across your Whole Company

Advanced analytics let you report on performance across your teams, including locations, users, templates, audits and even drill down to specific audit questions.

Manage risks and see how your team and worksites improve over time.

## Digital Auditing Record

Centralize your auditing and inspection system in the cloud. All digital audits are synced to your SafetyCulture account so you can pull reports from anywhere, at anytime.

## Work smarter with detailed inspection reports

Make informed business decisions by using data collected within audit reports. Get the insights you need to optimize every process and instantly see the status and trends within your company. No need to ever use a paper form again.

## Export Reports and Data

Export your report in a range of formats at the push of a button within SafetyCulture iAuditor. Email them to your teams and management at the tap of a finger. You can access your archived list of audits in the SafetyCulture desktop platform at anytime.

## Shorter Turnaround Time

No need to wait a week or two for a written report. Get the insights you need instantly from your team, contractors and more using SafetyCulture's instant reports. Conduct an audit and have all your audit information captured to send off in a neat, professional format.

## Export Reports In A Variety Of Formats

## Customize Your Reports

Fillable PDF reports aren't making your life easier. Customize your inspection report by using the SafetyCulture iAuditor export profiles. Add a template logo, edit the header fields on your title pages, customize the size of your image files, and bring the template inline with your company branding. Professional, shareable reports instantly. Learn more about Export Profiles.

## Share Reports With Your Team

Ensure the data being collected is going to the right team members. For example, you can create a unique Export Profile called 'Management' and send your completed reports via email or Dropbox to the management team by selecting your delivery method and saving that Export Profile to use whenever you need to send the reports.

## Use Our API Integrations

Power up your analytics by integrating your own business tools with your SafetyCulture iAuditor data. You can take your SafetyCulture iAuditor data and make it meaningful to your business. By combining your SafetyCulture iAuditor data with other critical business information you can get a complete snapshot of insights. Your IT team will benefit from the API access.
