

iAuditor Temperature & Humidity Sensors Pricing

September 2020

Your options

We offer two pricing options for iAuditor Sensors so that you can get started with sensors in the way that works best for your business. You can either:

- 1) **Rent** the hardware and pay a subscription fee for both the hardware and the software, with no cost upfront*
- 2) **Buy** the hardware upfront, and pay a lower subscription fee for the software

1

RENT: Hardware and Software Subscription (OPEX only)*

Sensors - cost per unit	Gateways - cost per unit
\$0 upfront cost	\$0 upfront cost*
JUST \$15 per month (if billed annually)	JUST \$30 per month (if billed annually)
OR \$19 per month (if billed monthly)*	OR \$38 per month (if billed monthly)*

2

BUY: Hardware Upfront with Software Subscription (CAPEX + OPEX)

Sensors - cost per unit	Gateways - cost per unit
\$145 per sensor (one-off purchase)	\$500 per gateway (one-off purchase)
PLUS \$5 per month (if billed annually)	PLUS \$20 per month (if billed annually)
OR \$7 per month (if billed monthly)*	OR \$25 per month (if billed monthly)*

Which pricing option is best for me?

Option 1 - RENT: Hardware and Software Subscription (OPEX only) is great if you want to keep your initial, up-front investment low and want greater flexibility to expand, reduce or swap your hardware over time.

Option 2 - BUY: Hardware Upfront with Software Subscription (CAPEX + OPEX) is ideal if you have greater certainty over your hardware requirements and want to minimise your ongoing, operating costs.

Why is there a separate hardware cost and subscription cost?

As well as the cost of the actual devices, sensors cost money to run. They need their own network to securely pass information from the sensors, to the gateway, and up to the cloud to be stored and used with iAuditor. As our gateways use mobile data, network costs are very similar to broadband internet.

How many gateways will I need?

One gateway can support at least 50 sensors, as long as all the sensors are in range of the gateway. The sensors have a ~300m (1000ft) indoor range from the gateway, as long as there aren't significant barriers between them (e.g. very thick concrete or steel walls). This may vary depending on your environment.

**T&Cs apply. Minimum contract term of 12 months for all subscription charges and pricing options.*

**Monthly billing is only available for payment via credit card (invoicing not available).*
