## Audit

### General

#### Enter description of procedure, task or worksite being assessed

One of the picker forklifts used inside the warehouse is noticed to have a delayed response in the recent use.

### Hazards, Risks and Controls

Click Add Hazard (+) after you have observed and identified a hazard

#### Hazard

##### Hazard 1

#### Identify the task

Picking, packing, and palletizing products.

#### What are the risks associated with each activity?

Can be dangerous to equipment users, especially when they are working in high-level heights in the warehouse.

#### Photo of hazard (optional)

Photo 1

#### Risk rating

Medium

#### Select control measures (include notes)

Engineering Controls

Repair the equipment immediately

### Completion

#### Recommendations

Remove the equipment from the work area until it's repaired and back to operating normally. If it won't be repaired, consider substituting with a new equipment.
